

Unlocking Sustainable Water Solutions

Apollo Disinfection Unit

Discover: Apollo Disinfection Unit

Water scarcity is a pressing global challenge that demands innovative solutions. For global horticulture, the imperative for sustainable water management has never been more critical. Enter The Apollo, a cutting-edge water disinfecting system powered by low-pressure UV technology, designed for disinfecting drain-, condensation- and rainwater, making it safe for reuse in your irrigation system, for a sustainable and more efficient future.

Why Choose The Apollo?

Investment that pays off

- Low investment, low maintenance, and consumption costs
- Savings in fertilizers approximately 35%
- Quick payback period

Designed with flexibility in mind

- Expandable with a hydrogen peroxide unit
- Available in capacities starting at 1.4 m³/h
- Functions as a stand-alone installation

HortiQ Certified

- The Apollo is HortiQ certified, meeting the highest industry standards in horticultural technology
