

HALOFOG

FOGGING MACHINE SUITED FOR CROP PROTECTION AND DISINFECTION

Fog more and better in less time

The Halofog combines a huge fog capacity while maintaining a very small droplet size. With the use of compressed air the capacity can be ramped up easily. The Halofog can be configured completely to your needs with a choice of tank size, number of nozzles, manual or automatic controls. Both mobile units as completely integrated fogging systems belong to the possibilities. The Halofog is suited for fogging temperature sensitive crop protection solutions as well as strongly corrosive disinfectants. Due to the use of compressed air, the Halofog is very reliable and maintenance friendly.

Depending on the options on your fogger, your product may look different from the image.

FOGGING & HYGIENE

HALOFOG

FOGGING MACHINE SUITED FOR CROP PROTECTION AND DISINFECTION

Specifications

- Fogging machine on compressed air or electricity
- Large circulation due to powerful ventilator (920mm)
- Fully automated fogging program, incl. ventilation (pre and after), rinsing (pre, during and after) and programable start time
- Robust stirring device
- Small droplet size for wider range
- Low maintenance

Capacity

Fog capacity between the 40 and 400 litres an hour, depending on the configuration.

Air throw

150+ meters.

Droplet size

16 µm.

Tank size

100, 200 or 300 litres.

Power

700 litres per nozzle per minute at 6 bar compressed air. 400 V.

Mobility

Mobile, but not during fogging. Sometimes hanged from the ceiling.
