Harvest and transport trolleys

We offer you:

- Robust and manoeuvrable design
- Ease of maintenance
- Flexible to set up and use
- Efficient in transport

Berg Hortimotive harvest and transport trolleys are the most popular transport trolleys on the market. You can use these trolleys for all crops, such as floriculture, but they were designed primarily for the tomato harvest. The trolley is available in different sizes and can be deployed for immediate harvesting when fitted with the right top rack and roller conveyor. This robust trolley has been designed for a long service life and ease of maintenance. Thanks to the special swivelling wheels, the trolley is still very manoeuvrable even when fully loaded. Moreover, the unique folding triangular link ensures user-friendliness and reliability.
