Benomic S-Line

We offer you:

- Highest model up to 6.6 meters
- Smart control panel with USB connection
- Designed for ease of maintenance
- Ergonomic and safe to TÜV standards

The Benomic S-Line mobile scissor lift is specially developed for the cultivation and care of high-wire crops, with the tallest model extending to a height of 6.6 m. TÜV-certified as compliant with the latest regulations, both the mechanical design and smart control system of the S-Line incorporate new safety features. These ergonomic scissor lifts are also highly user-friendly due to the access from both ends, the turbo button to boost horizontal speed to as much as 110 m/min, and the controlled descent and soft landing.

The smart control panel with built-in USB port places all control functions at the user's fingertips, and has a display showing relevant status information. And of course, with a compact, stable and robust construction, the mobile scissor lift is easy to manoeuvre on paved floors and paths.
