DRIVE SYSTEMS

www.degierdrivesystems.com

Together we can reach further

As a drive installer, you need more than just drives. You want to be able to rely on good advice. You want to feel supported before, during and after delivery. You want to be able to discuss solutions to any technical complications. In short, you don't want a delivery but a relationship. Together with strategic partners, De Gier Drive Systems aims to provide drive systems for existing and new emerging markets. Innovation, cooperation and synergy are at the heart of our development. After all, together you will get further

The company

Started in 1954 as a traditional family business as a sole trader. Now an ambitious manufacturer of complete drive systems, mainly for horticulture and (poultry) livestock farming. That is De Gier Drive Systems. You will come across our high-quality gear racks and geared motors all over the world. We have a large number of service points around the world, from which we can provide you with quick support. A well-functioning drive system requires seamless integration in the greenhouse or shed. That is why we focus primarily on greenhouse builders, stable builders and installers. .

Usefull ideas

De Gier Drive Systems is one of the world leaders in drive systems. A position that we have achieved mainly by simply listening. Of course we stand behind the high quality of our products and innovation is a hard requirement. But we also realise that demands are often different. That is why we like to enter into dialogue with our partners. If we can make targeted adjustments, we will certainly not fail to do so. The market as a source of inspiration and you as a provider of new drive solutions.

Our vision

De Gier Drive Systems is an innovative global market leader and manufacturer of drive systems for greenhouse horticulture, intensive livestock farming and crop storage. Our systems enable our partners to optimally manage climate and growth conditions in order to achieve their sustainability goals.

Our mission

De Gier Drive Systems works with strategic partners to provide drive systems in existing and new emerging markets. Innovation, cooperation and synergy are at the heart of our developments

Preventing problems

At De Gier Drive Systems we like to think along with you. During or after your installation project, for example to resolve any technical complications together with you. Already during the design phase we therefore look far beyond the drawing board. With calculation programs designed by us and now in great demand, we are at your service. And our R&D team is of course also ready to consult with you frequently.

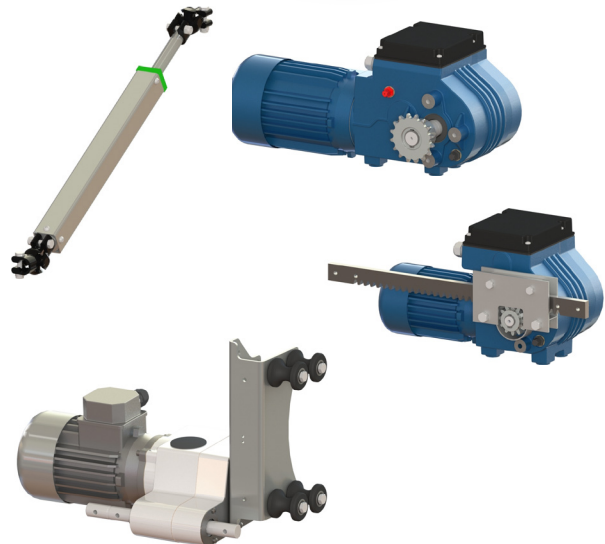

Control and control...

Meticulous professionals, computer-controlled machines, high-quality materials and constant quality monitoring... These are the ingredients with which De Gier Drive Systems guarantees you top quality. All our rack and pinion systems and geared motors are calculated according to the correct standards. Using CAD programs, parts are put on a drawing and then produced, assembled and checked! The end product will meet your highest requirements, whether it be a standard product or made to your specifications.

GW motorgearbox

We would like to draw your special attention to our GW range with, among other things, a complete series of geared motors developed according to a unique concept. By using the latest techniques and materials, they offer you superior quality on all fronts. They are extremely compact, powerful, durable, noiseless and maintenance-friendly. The heart of the system is a linear limit switch that operates very accurately and limits the gearbox in any desired position. All types can be supplied with an I-DE for applications in computer-controlled installations. GW also offers a series of powerful rack and pinion systems and robust control boxes. In short, everything has been well thought out. The GW has been developed together with your colleagues: people who know from experience what is important.

What to expect from us

Active contributions

We carefully listen to our customers and partners in order to come to innovative and inventive solutions. We make active contributions in order to achieve targeted solutions with excellent results for everyone involved. Making such active contributions leads to excellence and maximum synergy.

Ambition

Our team consists of dedicated, highly skilled employees. They are always prepared to go the extra mile to present a solution. We are not afraid of taking the road less travelled. It allows us to advance further and gain new insights.

Loyalty

Our primary goal is to develop long-term relationships. We know that together we make more progress in the long term. Our speciality is drive technology with a clear focus on our customers and our distributors. We never do business directly with end users. We stick together through thick and thin.

De Gier Drive Systems is one of the world's leading companies in drive systems for international horticulture, intensive livestock farming, crop storage and non-residential facilities. Our systems are used in ventilation, screening and hoisting solutions in glass greenhouses, poultry sheds, storage facilities and other buildings. We work with our customers, partners and suppliers to develop innovative, sustainable and user-friendly solutions. We invest in long-term relationships and global partners. We actively contribute to our customers' endeavours and we always provide a suitable solution. We do this based on mutual trust and flexibility.
