WHY TRAIN YOURSELF OR YOUR STAFF?

Why train yourself or your staff?

Transferring knowledge is the passion of our Education team. The fast worldwide spread of greenhouse technology causes an increasing necessity for horticultural know-how. We believe that the right knowledge and set of practical skills will optimize your business results. We are offering you this improvement of knowledge and skills.

With a great passion for food and flowers the Education team is sharing their knowledge with growers, crop managers, investors and advisors all around the world.

Training and courses

We are offering a wide range of trainings and courses for individuals and groups lasting from one day up to one year internship with coaching.

We are offering the following courses:

- Online course Greenhouse Management Hightech cultivation
- Online course Introduction to basics of Fertilization in Horticulture
- Online course Fertilization in Horticulture
- Greenhouse Management Vegetables
- Training Cannabis Cultivation
- Tree Nursing Practices & Management
- Three-day Training Greenhouse Softfruit Cultivation

Set-up & Approach

Our team focuses on converting theoretical knowledge into practical skills & tools making the staff in your greenhouse business more efficient and knowledgeable when it comes down to running or working in a greenhouse environment.

Our approach is to always fine-tune the training programs to the demands of the participants and their individual situation. The combination of lectures inside classrooms and practical sessions at the Horti Experience Centre where participants work with the crop and steer the greenhouse climate during longer lasting trainings has proven to be a success.
