growfoam[®]max

the all-new **growfoam**[®]max

growfaster

growfoam[®]max is an all-new foam substrate with an even softer foam structure and a brand new design. Leading to **easier, faster, and optimized root development** from day (or DAS) 1. With even more competitive performance versus organic material.

DAS 37

Uniformity:

With a new optimized design, **growfoam**[®]max offers improved growth uniformity due to lack of stress. This reduces failure for all crops.

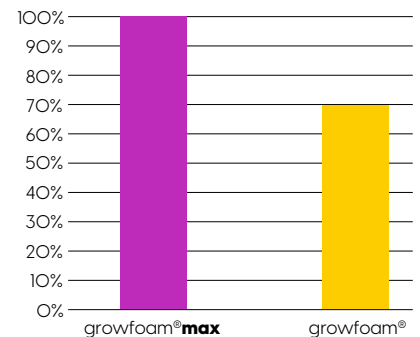

Efficiency:

New 144 cell trays for 27mm plugs are a perfect fit for Meteor floaters.

Reduce your operational costs:

100% automation-ready, no price increases for 2022, and near-infinite shelf-life.

Fresh weight improvement:

growsafer

growfoam[®]max offers the same risk-free performance you'll be familiar with from using the regular **growfoam**[®] substrates.

Risk-free performance:

Produced in the Netherlands and building US stock to reduce lead time and shipping costs.

Clean:

growfoam[®] contains no pathogens and is completely free of E-Coli and Listeria.

Reliable:

Every **growfoam**[®] batch is produced to exactly the same specs and is 100% inert. Your nutrient recipe will never change (unless you want it to).

the all-new

growfoam[®]max

growgreener

growfoam[®]max is the only sustainable and future-proof growing solution available to date. 100% bio degradable, peat-free, and completely recyclable. With the optimized **growfoam[®]max** substrate recipe, we now advise reducing watering frequency from 24 to 12 times per day.

growfoam[®] is now TÜV Home Composting certified, alongside its TÜV Industrial Composting certification.

This means **growfoam[®]** substrates easily decompose in compost heaps.

No peat:

growfoam[®] is completely non-organic. No peat mining is needed, so valuable peat environments can stay intact.

Waste:

growfoam[®] leaves nothing but water and CO₂ behind, which is fully compensated in line with the international Gold Standard criteria.

No PFAS. No micro plastics:

growfoam[®] contains no harmful materials such as PFAS and microplastics, that can end up in the produce or the environment.

More info?

Try our new **growfoam[®]max** now.

Contact us and our substrate specialists will help you get *the max* out of your growing system with the all-new **growfoam[®]max** substrates.
